Objective

Rhythm of Business (RoB) Calendar keeps you on top of your business goals by managing all team and organizational events seamlessly. Simplify and expedite the coordination and planning process for your team and subgroups with the help of color-coded events, approval workflow, refiners, and confidential events. Ideal for Chiefs of Staff, Executive Assistants, or anyone who manages a team calendar, you can empower your teams by enabling better insights on your business goals and team events.

Release Notes

Version	Release Details
v.1.0.0.0	Initial Release
v.1.0.1.0	Enhancements: 1. Rich Text editor support for description field on new/edit event panel Bug Fixes: 1. Link copied using Copy Link feature is not opening the specific event in panel 2. For Recurrence Series Meetings, Add to outlook is not downloading the ics file 3. For full day monthly recurrence series, the event splits into 2 days on calendar
v.1.0.2.0	Enhancements: 1. Event Time zone update to display events in SharePoint site time zone. 2. Restricted permission for users having Edit permission can create and edit. Read only users will not be able to see add/edit event button.
v.1.0.3.0	Bug Fixes: 1. Full day recurring events are showing 12:00 AM to 1:00 AM instead of 12:00 AM to 11:59 PM on view panel of the event. 2. Full day recurring event is not showing last day occurrence unless the page is refreshed.
v.2.0.0.0	Enhancements: 1. Migration feature to get old collab calendar data to Rhythm of Business calendar
v.4.0.0.0	Enhancements: 1. UI improvements for the Settings screen for detail sections. 2. UI improvements for Monthly view and text format changes for the event 3. Time dropdown option to create events have multiples of 5 for minutes. 4. Add to Outlook option is configurable on settings panel. 5. Include option in settings for Email notifications for approval.

	- Export the current view of calendar into Image, PDF and PPT. - Add the options in setting panel to select fiscal year in the quarter view. - Adding Year value in the quarter view month view. - List view to see event details for selected date range in a tabular format. - Search functionality to search the events. - Export the current view of calendar into Excel file. - Template View Settings (for Month and Quarter view) for customization. - Action Items field when creating a new Event. - Added Color contrast accessibility in color refiner for better visibility of text in event card in calendar. Bug Fixes: - When one recurring event is deleted, it was creating duplicate events - Weekend events were not created for recurring events. - While creation of new event, stop sending approval mail when send email setting is turned off. - Calendar webpart not loading when text in description field contains color or invalid style tags. + New button is not visible when hover on calendar date tile - Restrict the selection of users/groups type which are not supported by SharePoint for confidential Event (Eg: Distribution List are not supported) - Accessibility Bug fixes and minor UI bug fixes related to date rotator.
v.5.0.0.0	Enhancements: - Enable/Disable application cache in browser - Display Calendar time zone - Display outlook calendar Last Sync On date in Application - Load filtered data based on event start date to improve calendar performance for large number of events. Bug Fixes: - Accessibility bug fix

Prerequisites

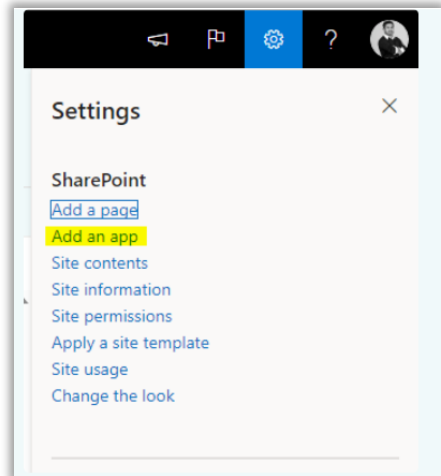

The only prerequisites for this solution to work are:

- This tool uses SharePoint as the backend. Before you install you must make sure you have a communication or Teams site. You must also be site owner.
- In order to install the Rhythm of Business calendar on your site. First make sure you are part of the **Rhythm of Business Calendar** group.

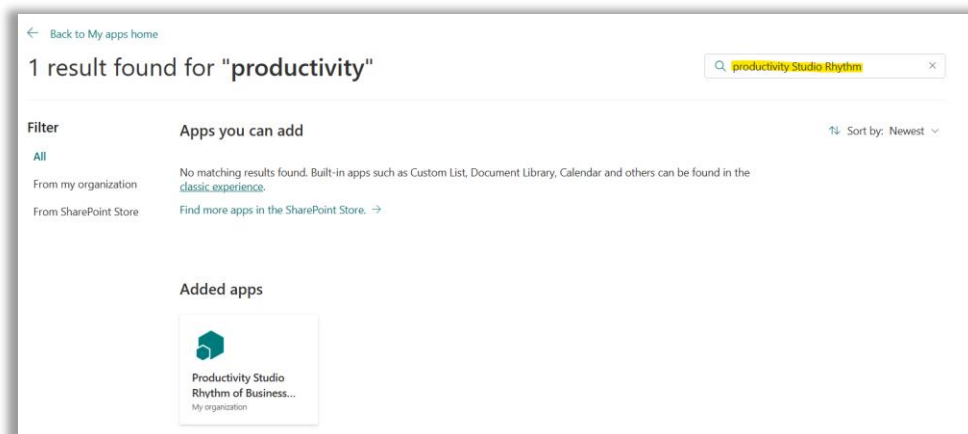

Steps to Install Productivity Studio Rhythm of Business Calendar App.

Step 1:

Go to the gear in the suite navigation bar and select Add an app.

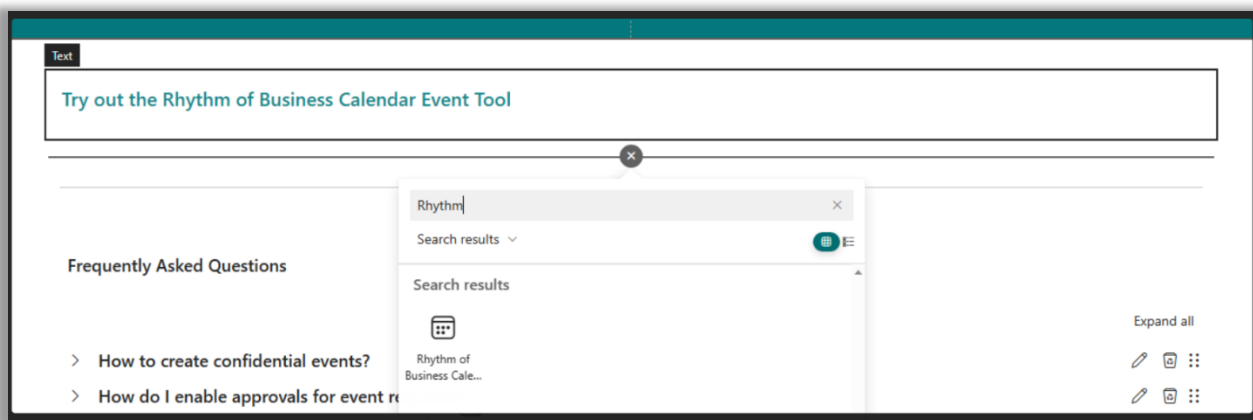

Step 2: Search for "Productivity Studio Rhythm of Business" and click Add to begin the installation process.

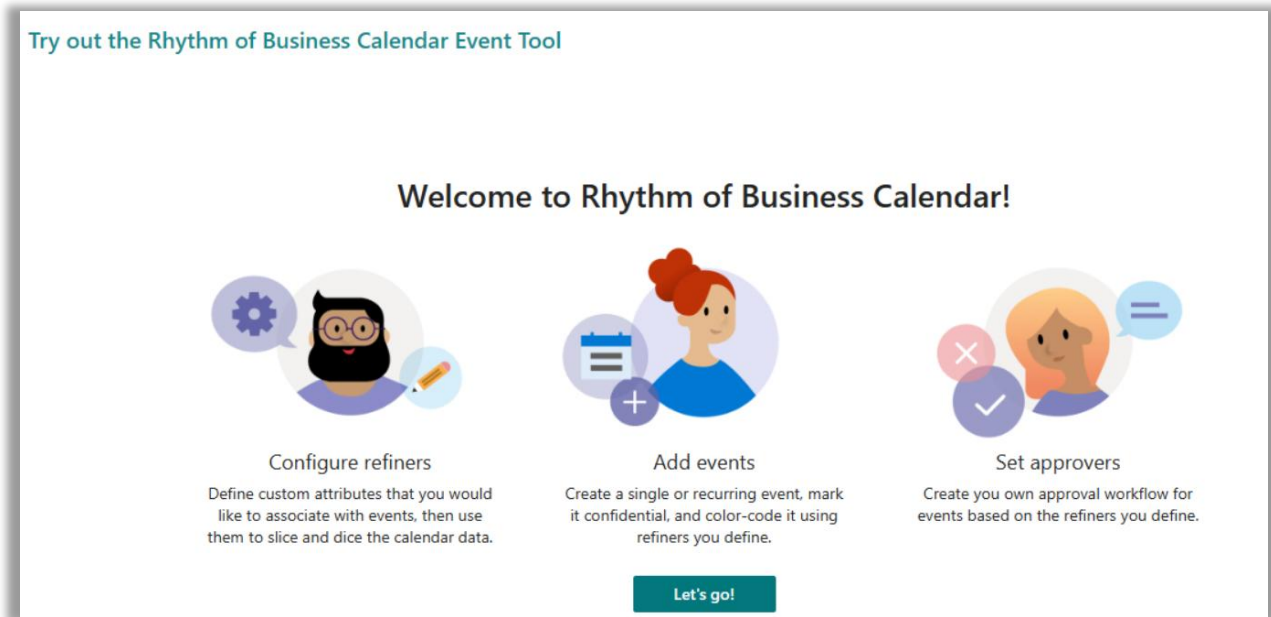

Step 3: It will take a few minutes to install the app. If the app name is grayed out under Site Contents, that means it's still installing.

	Out of Office Calendar	Events list	21	4/19/2022 11:58 AM
	Power BI	App		9/23/2013 9:47 AM
	RedirectsManager	App		3/5/2021 3:16 PM
	Rhythm of Business Calendar	App		12/20/2022 6:11 PM
	RoB Calendar	Events list	0	5/9/2019 2:19 PM

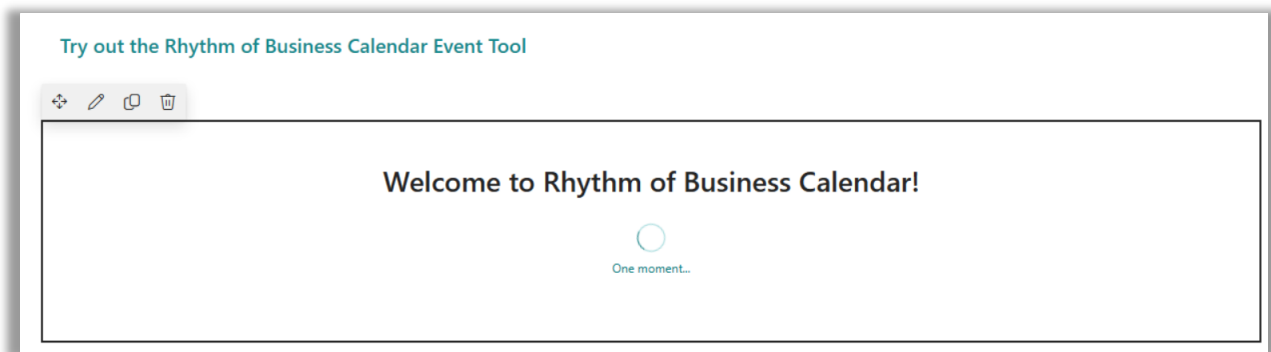

Step 4: Now edit any SharePoint modern page by clicking the **Edit** button. To add the new webpart click on a "+" symbol on the page, then find the newly installed Rhythm of Business Calendar web part in the web part gallery.

Step 5: Add the Rhythm of Business Calendar web part to the page and on the welcome screen click the Let's go button to get started

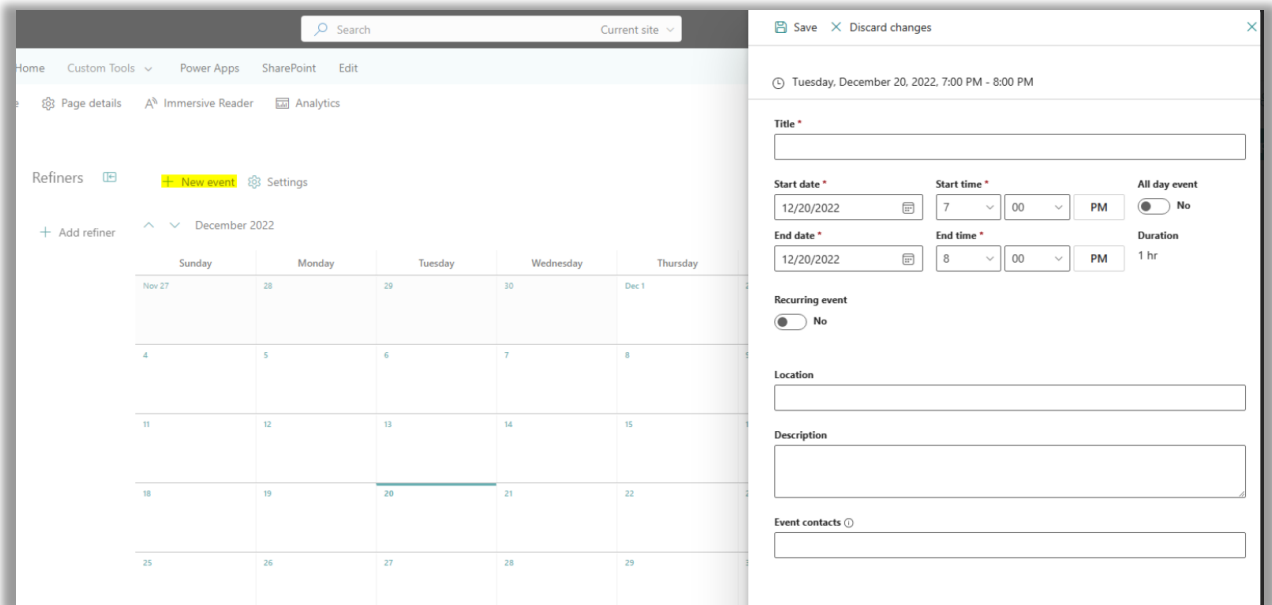

Step 6: The app will take a few moments to load. You will see a **One moment** loading screen. The calendar is creating the backend lists that will be used to store your configuration and event data.

Step 7: Once the setup is completed you will see a blank calendar on your page. You can now use your Rhythm of Business calendar. Try creating an event by:

- Click the New Event link to create your first event.
- Fill in the information required for your event

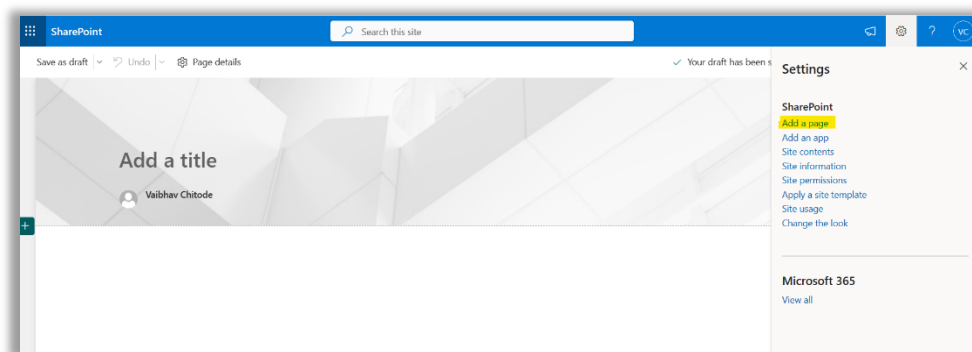

Please note there are a few things to be aware of:

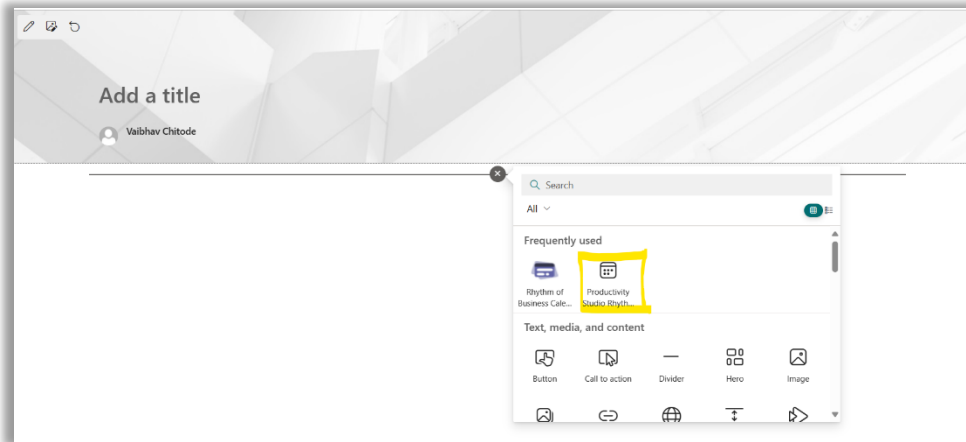

- Multiple time zones are currently not supported.
- Only single instance can be installed for one team.

How to add app into teams

- Create the page in SharePoint using the gear icon and add webpart on the page.

- Add webpart on the page.

- Go to teams and add that page in tab

Application Overview

This calendar was created to help teams manage and maintain all team and organizational events. Empower your teams and organizations by enabling better insights on calendar events and coordination. The solution offers the following functionality:

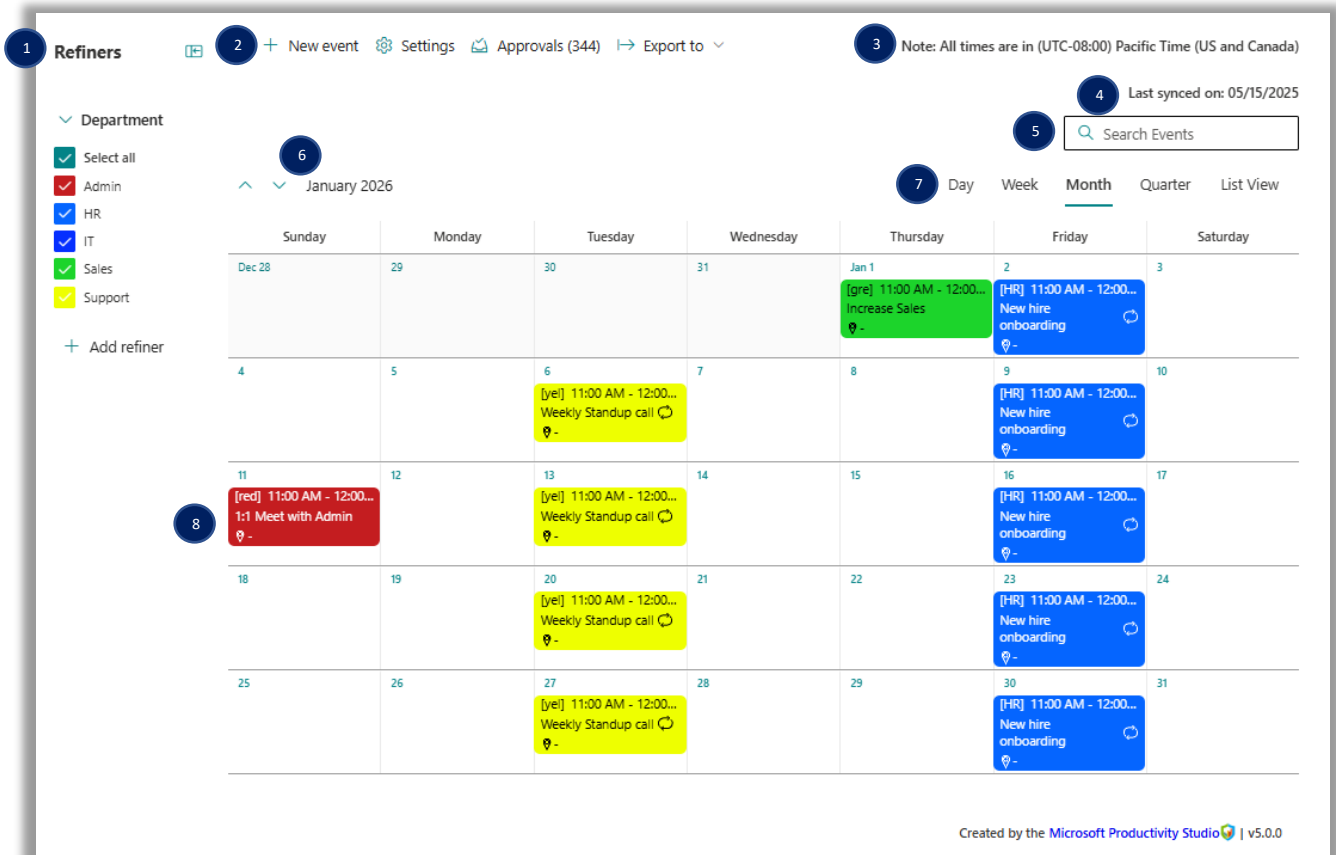

- Day, Week, Month, and Quarter views provide insights into upcoming events.
- Ability to define and create custom refiner categories that allow you to filter and slice events on the calendar.
- Assign custom colors to custom refiners to easily identify events on the calendar.
- Admin event Approval. Team Owner/approvers can approve or reject the events requested by team members.

User Guide

Landing Page

The Landing page for the Rhythm of Business calendar use a simple calendar grid to display events in your Teams. By default the 'Month view' will be selected. This can be re-configured based on the setup in Settings screen. The calendar allows you the ability to refine and search for your events.

In the latest version the UI for the events display looks as given below:

Key Features:

1. **Refiners:** As a Team's owner, the user should be able to create new refiners so that end users have better visibility of the event metadata. Only one refiner can use color and tag.
2. **New Event:** To add a New Event, click on "+ New Event" to open the new event panel and add an event to the calendar.
 - No limit on how many refiners can be created.
 - Use Color and Use Tags - Max one refiner can have this property. Ability to swap this property between 2 refiners.

- Users should have at least Edit permission to create New Event.
3. **Display Calendar time zone:** This field to display the time zone in which calendar events are being displayed.
 4. **Last Synced on:** This field to display the outlook event last sync date it will be visible only when event synced in ROB from outlook using flow.
 5. **Search Event:** Ability to search event based on the event's title, description, location, and event contacts.
 6. **Current Date:** Click on the current date to open the date selector for quick navigation through different dates in the Calendar.
 7. **Day, Week, Month, Quarter & List Views:** Select one of the tabs Day/Week/Month/Quarter/List View to view upcoming events.
 8. **Events:** Each event has a detailed view. To view event details, click on any event in the calendar.

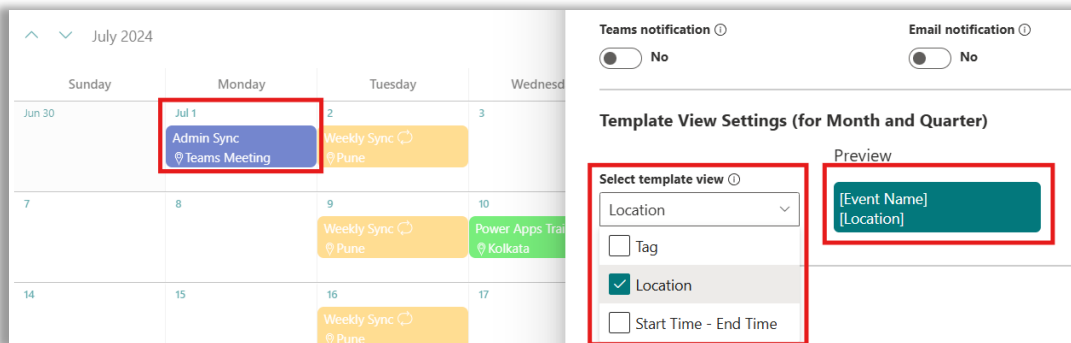

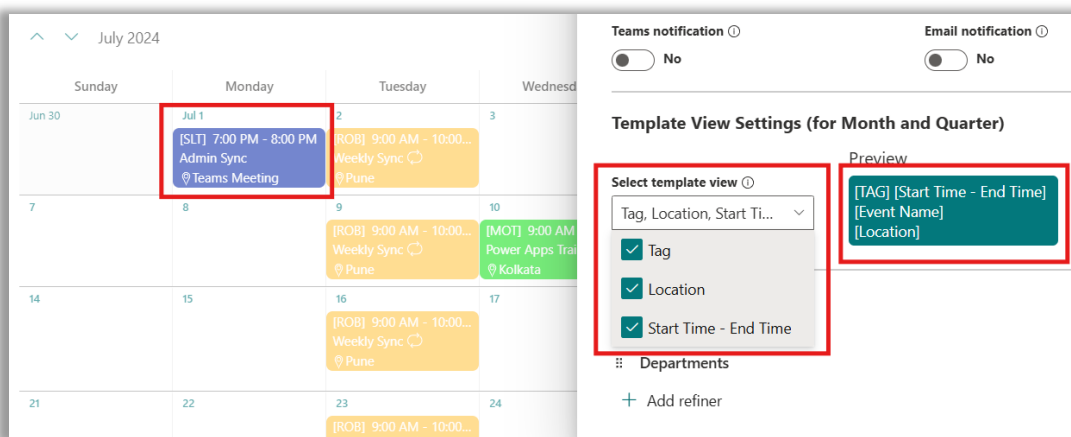

Settings Screen

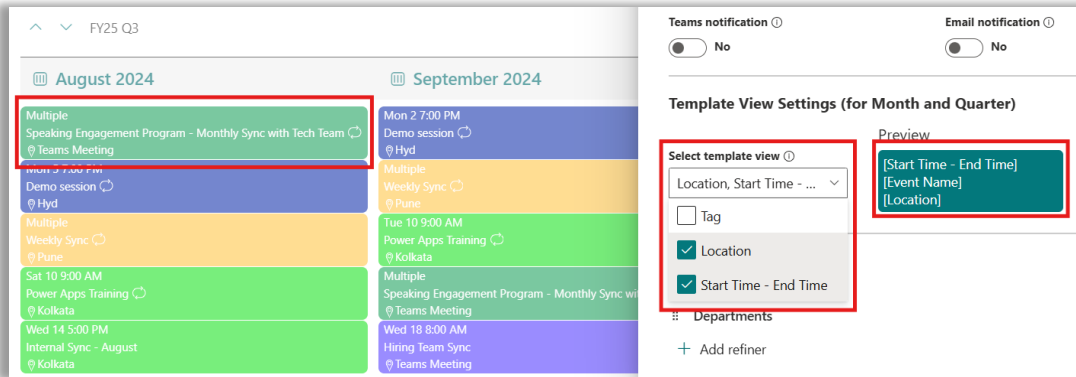

For initial set up, the Team Owner/Admin has the ability to control the configuration/settings of the app. This will set the default settings for how the app will appear to regular end users/Configurations include:

1. **Initial View:** Default view that will appear to users when the app starts.
2. **First Month of your fiscal year:** Determines the fiscal quarter for the calendar year.
3. **Show Fiscal Year as:** Determines the fiscal year for the calendar view
4. **Use refiners:** Turns refiners on or off.
5. **Refiner Configurations:** Whether the refiner rail will initially display expanded or collapsed when the app first starts.
6. **Quarter view group by:** Determines how events are grouped in the quarter view.
7. **Allow confidential events:** Turn on or off the ability for users to create events that are only visible to specific people or groups.
8. **Enable Add to Outlook:** Enable add to outlook feature for downloading the .ics file and add as an outlook invite. If turned off, then this option will be available on the events details or else it will not be available.
9. **Select List column view:** Select columns to display details for the list view.
10. **Enable cache:** Turn on/off the application cache in browser.
11. **Expire Cache (Hours):** Upon enable the above setting owner/admin need to provide the cache expiration time (in hours). Cache will be automatically refreshed after the mentioned number of hours.
12. **Show events after:** Set cutoff date from which you want to load the events in calendar, in case of large number of events, admins can set specific date to load events from that day to improve calendar performance.

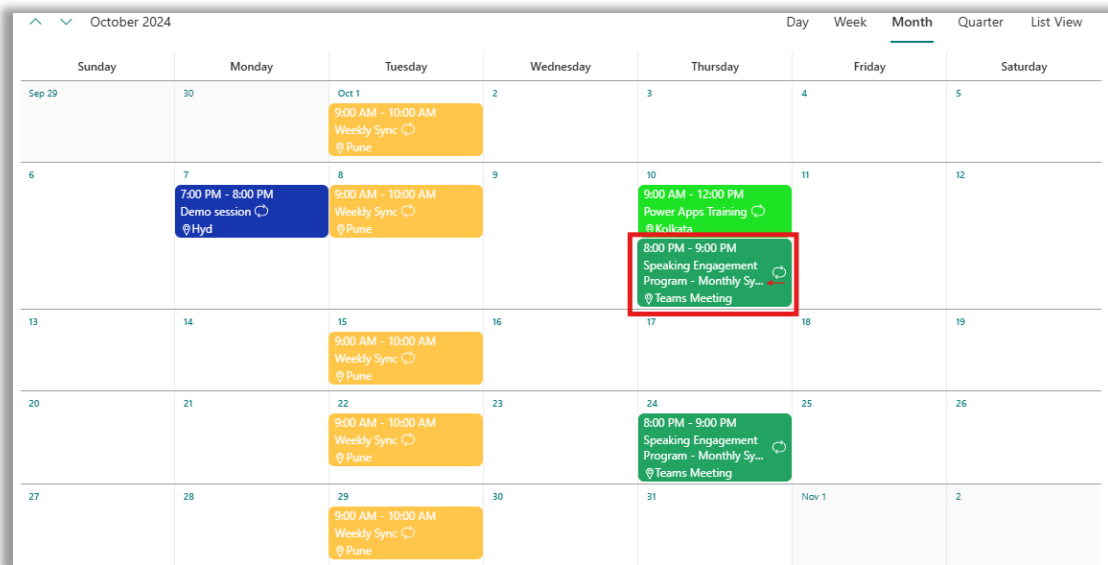

13. **Use Approvals:** Turn on or off approval workflow for events.
14. **Configure Approvers:** Add and configure approvers.
15. **Email notification:** The Turn on or off email notifications for approval of an event will be decommissioned soon.
16. **Template View Settings (for Month and Quarter):** Users can customize the template views for monthly and quarterly meetings by selecting options from the dropdown menu. The available options include "Tag," "Location," and "Start Time – End Time."

As users select different options, the preview image will update to reflect these changes, and the month and quarter views will adjust accordingly. The event title will be shown by default in all view. –

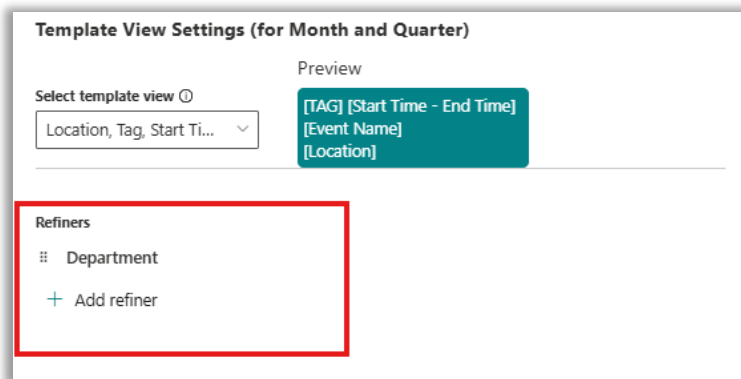

Additionally, if an event title is long, it will be displayed on two lines to ensure readability. –

17. Refiners: Add or configure refiners.

Calendar View

Leveraging the calendar view you can easily filter and find your upcoming events. Easily keep track of upcoming events for your team.

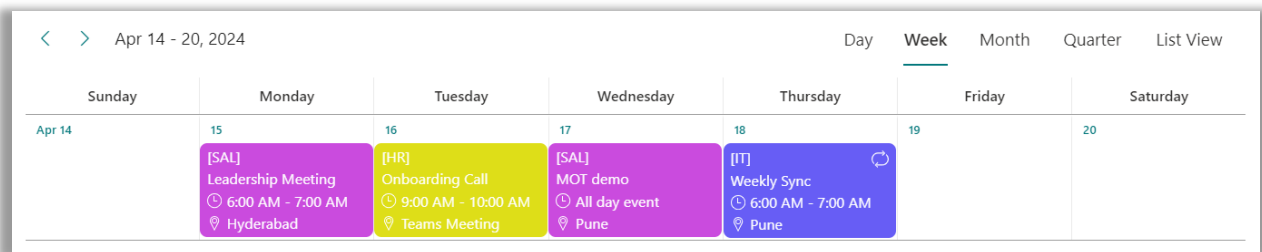

Day

The Day view provides a view of all the events that you have for the selected date.

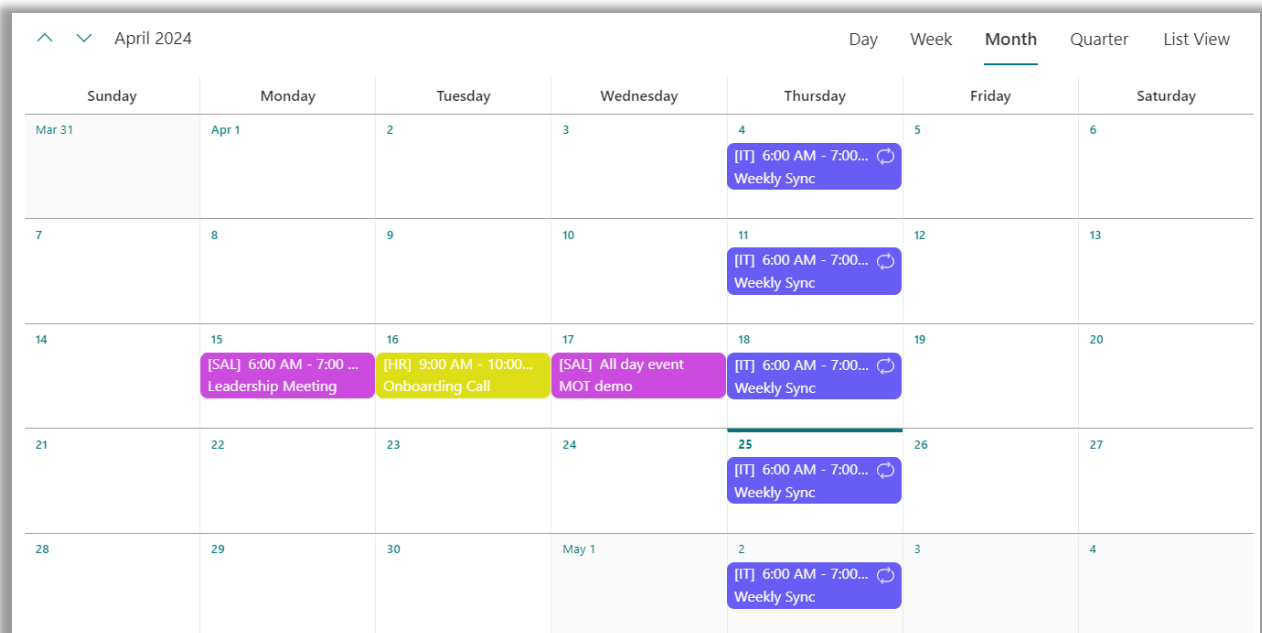

Week

The Week view provides a view of all the events that you have for the selected week. It will display events scheduled from Sunday to Saturday.

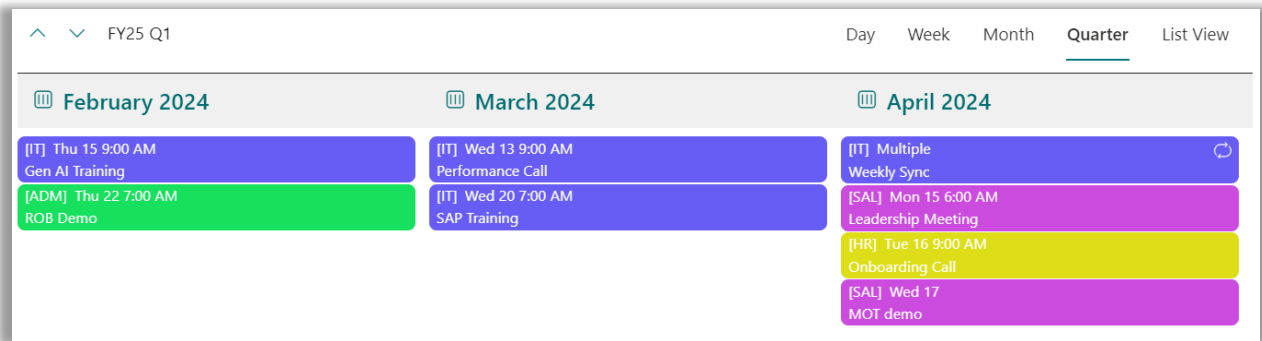

Month

The Month view provides a view of all the events that you have for the selected month.

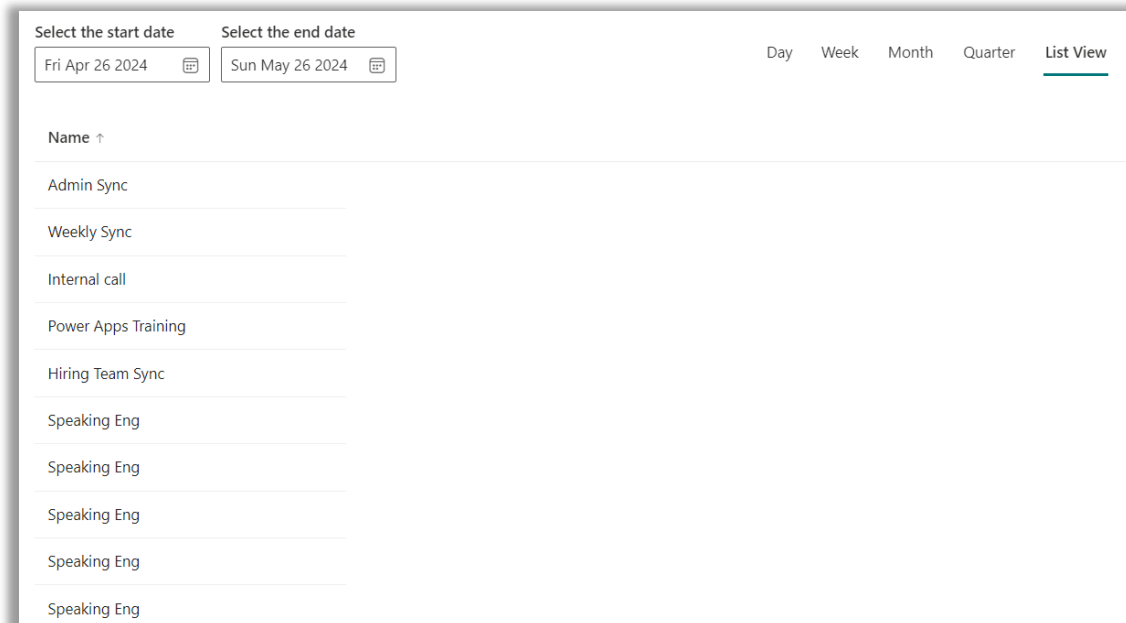

Quarter

The quarter view provides a view of all the events that you have for the selected quarter. Remember you can configure this in your settings. Use the Date rotator to move between quarters.

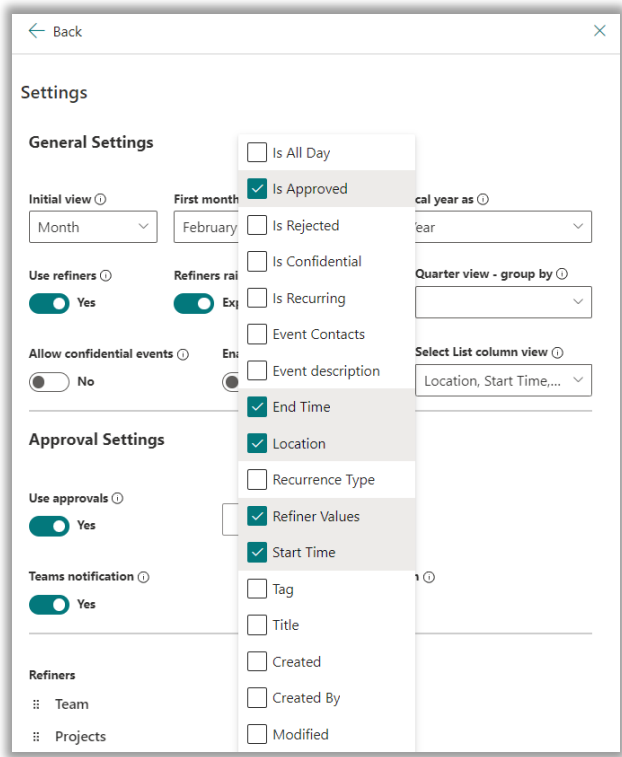

List View

The list view provides a view of all the events that you have for the selected date range. Admin or user can select the start date and end date to view the events. By default, the start date and end date are set to the current date and the current date plus 30 days, respectively. This will show future one month's events with its display name. Record can be sorted by clicking on name column header arrow.

For Admins -

Admin can select more columns to display in list view through the **Select list column view dropdown** in the settings panel. The list view shows event details for admin and other members, based on the selected columns. User can view more columns by scrolling horizontally.

Created on

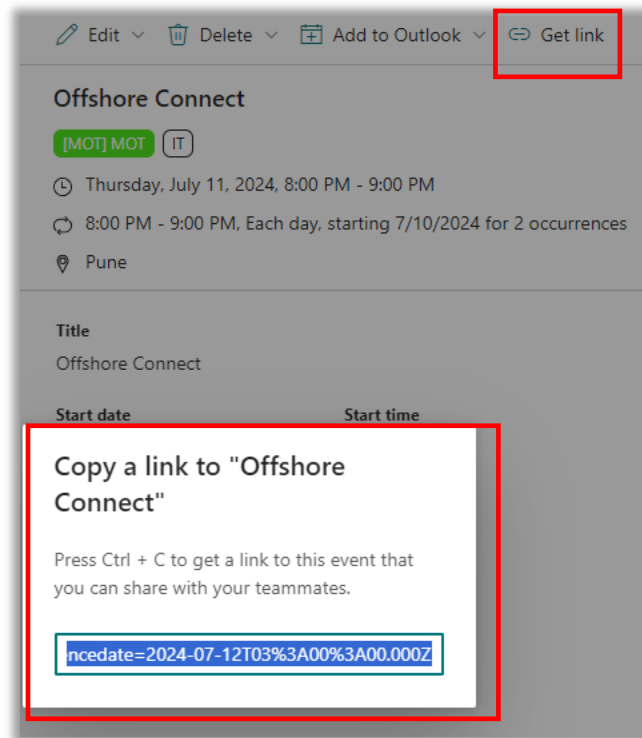

2. **Delete:** Event creators and calendar admins can delete an event created on their calendar. If the event is recurring, then the single Occurrence or entire Series can be deleted.

3. **Add to Outlook:** This feature generates an ICS file that can be downloaded and added to Outlook. The user can generate for a single occurrence or the series. Please note users will have to download the latest ICS file if the meeting is rescheduled. To use this feature, make sure "Enable Add to outlook" toggle must have ON under the settings.

4. **Get link:** The Get link option in the event details screen allows you to easily copy and share the link to the event.

New Event Panel

Use the New Event panel to add events to your calendar. The event details will be visible to all users of the calendar (unless it is confidential). If you have a network of calendars others will be able to see your shared events.

The screenshot shows the 'New Event Panel' with the following fields and controls:

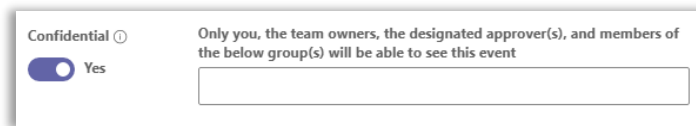

- 1** Title: A text input field for the event title.
- 2** Date & Time: Fields for Start date (10/28/2024), Start time (6:00 PM), End date (10/28/2024), End time (7:00 PM), and Duration (1 hr). There is also an 'All day event' toggle set to 'No'.
- 3** Recurring event: A toggle set to 'No'.
- 4** Location: A text input field for the event location.
- 5** Description: A text input field for the event description.
- 6** Action Items: A text input field for action items.
- 7** Event contacts: A text input field for event contacts.
- 8** Department: A dropdown menu for the department.
- 9** Projects: A dropdown menu for the project.
- Confidential: A toggle set to 'No'.

1. **Title:** Title for the event to be displayed on the calendar and shared calendars.
2. **Date & Time:** Set the start and end date and time for the event. Selecting "All day event" will automatically block out the entire day.
3. **Recurring event (optional):** Set the recurrence of an event as Daily, Weekly, Monthly or Yearly. Set the end date and details as per selected recurrence.

The screenshot shows the 'Recurring event' panel with the following options:

- Recurring event:** A toggle set to 'Yes'.
- Pattern:** Four icons for Daily, Weekly, Monthly, and Yearly. The 'Daily' icon is selected.
- Pattern details:** Radio buttons for 'Every' (selected), 'Every weekday', and 'Every month'.
- Start date:** A text input field with the date 9/27/2022.
- Until:** Radio buttons for 'No end date' (selected), 'End after' (10 occurrence(s)), and 'End by'.

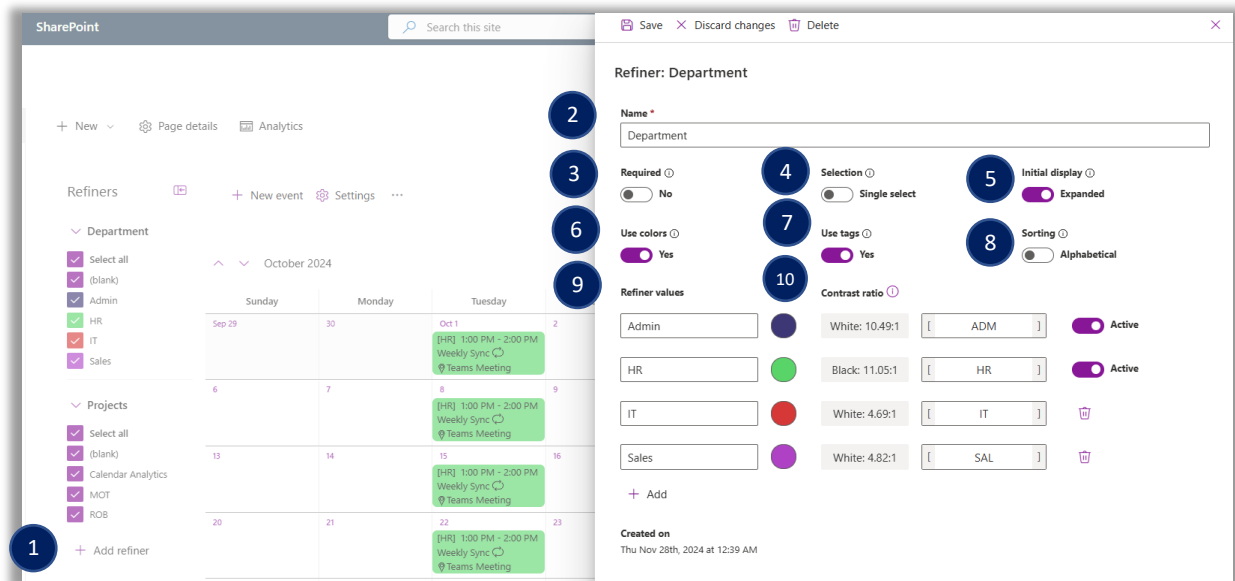

4. **Location (optional):** Free text field used to capture the Location of the event.
5. **Description (optional):** Free text field used to capture the event description. Other users can use this to understand more about the scheduled event. Rich text is supported in the description field.
6. **Action Items (optional):** Free text field used to capture the event Action Item. Other users can use this to understand more about list of all the action item they need to take. Rich text is supported in the Action Item field.
7. **Event Contacts (optional):** Field used to capture key event contacts.
8. **Teams, Tiers, & Event Type (optional):** Set the Teams, Tiers, & Event Type based on the values of the refiners. Users will be able to filter the Events based on these fields.
9. **Confidential Event (optional):** Users have the ability to set the event as a Confidential event. If the event is classified as confidential it will only be visible to the users added. Security groups, Email enabled security groups, Microsoft 365 groups and individual users can be added as target audience. Distribution lists are not allowed to enter.

The screenshot shows a user interface for setting an event as confidential. On the left, there is a toggle switch labeled "Confidential" with a help icon (i) and the word "Yes" next to it. The toggle is currently turned on. To the right of the toggle, there is a text box with the instruction: "Only you, the team owners, the designated approver(s), and members of the below group(s) will be able to see this event". Below this text box is an empty rectangular input field for specifying the target audience.

Refiners

Enable and use the refiners on the Rhythm of Business calendar tool to categorize your events. The refiner functionality helps to find events of interest more easily.

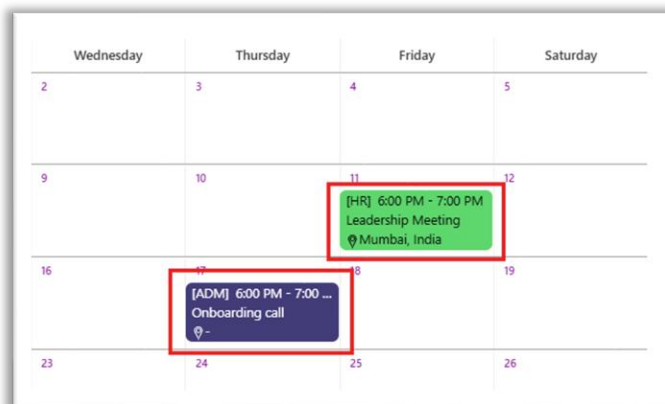

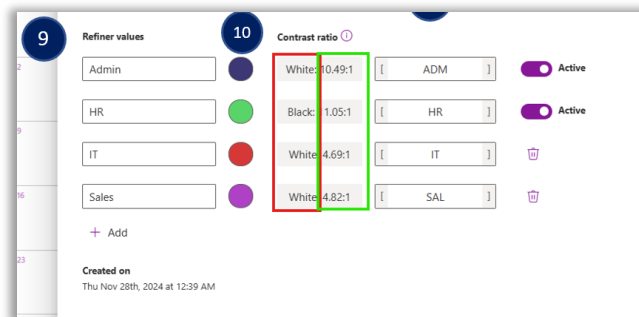

1. **Add Refiner:** Team owner has the ability to add or edit the refiner configurations. Clicking the Add refiner button prompts up the refiner configuration screen.
2. **Define the Refiner Category Title:** This is the refiner category title that will be used for grouping the refiners added.
3. **Define if the Refiner is required or optional:** If the refiner value is required then you can add.
4. **Enable Multiselect:** This feature is available for the new addition of refiner categories. If the 'Selection' toggle is selected, multiple categories of respective refiner category can be selected for an event.
5. **Enable the Initial Display:** This feature allows the user to control the default expand/collapse of the refiner category. By enabling the 'Expanded view' toggle the calendar will display the listing of refiners by default when the calendar is accessed.
6. **Enable the use of Colors:** This feature enables the ability for users to define a color for each individual refiner.
7. **Enable the user of Tags:** This feature enables the ability for users to define a text tag, of up to three characters, for each individual refiner.
8. **Enable alphabetical sorting:** This feature enables the ability to sort in a custom order or alphabetically.

9. **Add and configure refiner titles and color values:** In this section, users have the ability to add a new refiner and configure the Color or Tag. Users can also drag the order if the custom sort of ability is enabled.
10. **Color Contrast:** Its an non editable field which displays the information about the text color and contrast ratio between text color and background color of event card.

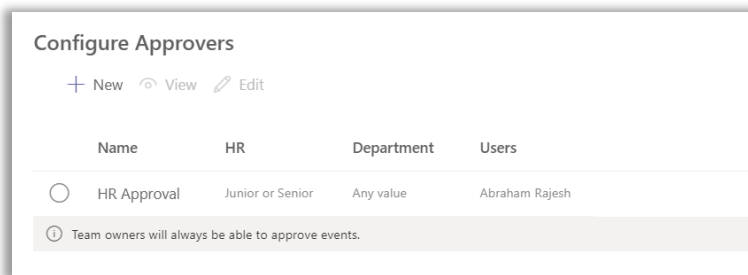

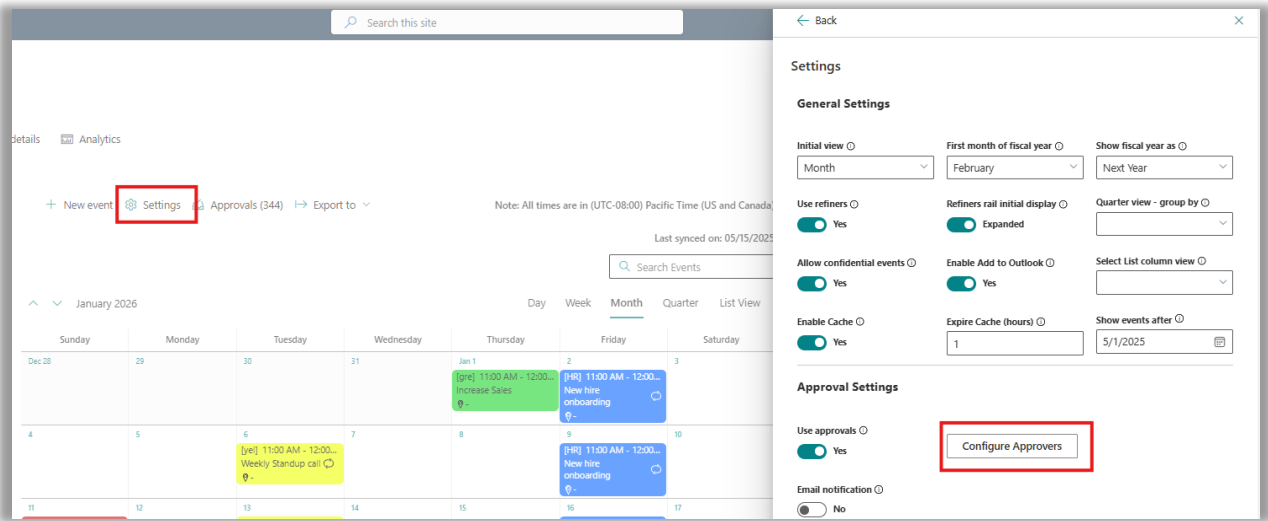

Friday event has green color as background in order to maintain contrast ratio for accessibility it set text color to black while for blue it set text color as white.

The left side(red box) indicates text color whereas right side(green box) indicates color contrast.

Configure Approvers

Admins can enable approvals through the app settings. Approval will be configured based on the selected Refiner. Different approvers can be assigned for each refiner with respect to the refiner values.

On the Configure Approvers screen when you select the '+ New' option you can add the configuration properties defined below.

1. Give this group of approvers a descriptive name *

2. HR: Any HR, Department: Any Department

3. Users *

These users can approve events with:

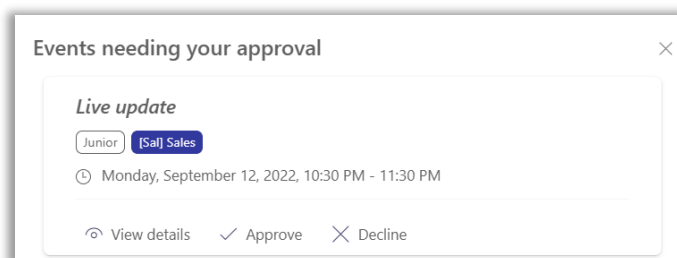

- Any HR
- Any Department

1. **Group Name:** Title your approval group name
2. **Refiner Selection:** Select what refiner needs to have the approval request enabled.
3. **Users:** Select the users that can approve these types of events.

Note: Make sure the users whom you are adding as approver must be part of members group to able to approve the events.

Approval Workflow

The Rhythm of Business Calendar Teams app has the ability to Notify the SharePoint panel that are used for approval of the events. This feature can be enabled or disabled in the configuration screen. If the Event Approval feature is enabled, Notify will be enabled on SharePoint page by requesting events to be reviewed for approval or rejection events. Also, the approvers can be configured based on the event category.

Approval Notifications

Below are the options available for selecting notification type.

Approval Settings

Use approvals ⓘ ☒ Yes	Configure Approvers
Email notification ⓘ ☐ No	

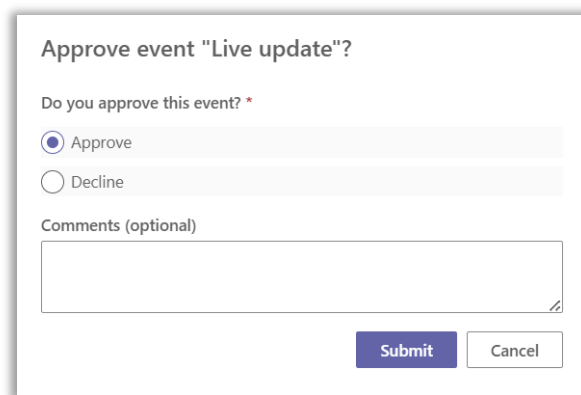

And clicking on the 'Please approve or decline this event' button will navigate directly to the event panel with the option to approve or reject.

Turn on /off Email Notification : Turn on or off email notifications for event approval" setting will be decommissioned soon

Approval/Reject notifications will be shown only in the SharePoint panel

Approve

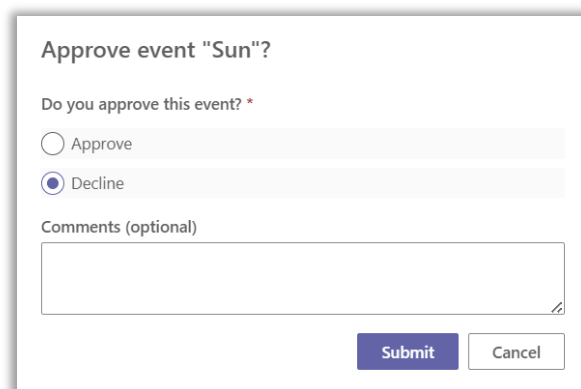

If the Approver clicks the approve button on the 'Events needing your approval' screen, a popup window will open with the approve option selected by default. The Approver can also add any comments prior to submitting.

The screenshot shows a modal dialog titled "Approve event 'Live update'?". It contains a question "Do you approve this event? *" with two radio button options: "Approve" (which is selected) and "Decline". Below the options is a text input field labeled "Comments (optional)". At the bottom right are two buttons: "Submit" and "Cancel".

Decline

If the Approver clicks the Decline button on the 'Events needing your approval' screen, a popup window will open with the decline option selected by default. The Approver can also add comments to the submission.

The screenshot shows a modal dialog titled "Approve event 'Sun'?". It contains a question "Do you approve this event? *" with two radio button options: "Approve" and "Decline" (which is selected). Below the options is a text input field labeled "Comments (optional)". At the bottom right are two buttons: "Submit" and "Cancel".

Note: The “Use-approvals” toggle whenever turned on, it requires all the events that are created using any refiners need to be approved by the admin. But if an event is created using refiners for whom approval rule is defined, in that case that event would also be available to be approved or rejected for the approval rule defined users and those events would be visible for the approval rule users.

Fiscal Year Quarter View

Whenever the toggle “Show fiscal year as” that is available from the above screenshot, is selected as “Current Year” as an option then the quarter view will show the fiscal year as current year else the fiscal year will be by default show as the next year as shown in another screenshot-

Export calendar view

The calendar view can also be downloaded using the export option from the menu shown below-

The options supported are Image, PDF, PPT and Excel. Select a particular view, click on the export options. It will download the file with the current view name on user's machine.

When you use the "Export to Excel" option, all columns available in the "Select List column view" dropdown from the Settings panel will be included in the exported Excel file. This happens regardless of the number of columns you have selected in the dropdown. Below is an example of a sample exported Excel file with the below available columns –

[Name, Start Time, End Time, Description, Is Recurring, All Day Event, Projects, Departments, Location, Tag, Is Rejected, Event Contacts, Is Confidential, Is Approved, Title, Recurrence, Created, Created By, Modified, Modified By]:

Event Time zone

The created event will always follow the SharePoint site time zone, it does not matter in which time zone the end user is creating the event.

Package Details

The Rhythm of Business (RoB) Calendar Teams app can be installed on Teams. Rhythm of Business (RoB) Calendar Teams app will automatically create 5 lists in the Team's backend SharePoint site to

store and configure the application data. Below you will find a brief overview of each list and its purpose.

Data Source

The Data source used for this solution are SharePoint lists. The table below highlights the purpose of the 6 lists that are created after installation:

List Name	Purpose
RoB Calendar Configuration	Custom List. This list is used to store the Configuration settings for the Calendar.
RoB Calendar Refiners	Custom List. This list is used to store the Refiners group headers.
RoB Calendar Refiner Values	Custom List. This list is used to store the Refiners Values under Refiner header.
RoB Calendar Events	List created from Calendar list template. This list is used to store events.
RoB Calendar Approvers	Custom List. This list is used to store the events approvers mapping for Refiner Values

SPFx Package

App is built on SPFx. Package name is RhythmOfBusinessCalendar.sppkg

Permissions

The application inherits permission from the SharePoint Site it is installed on. Any user who is part of the site group can access this app. The Site Owners and Members roles are used to control the approval permissions on the app.

Known Issues

- **Issue 1:** Add to Outlook series ics file does not show the modified start date for all day daily recurring events.
For example:
 - Create a daily recurring event - starting from 10/18/2023 for 2 occurrences, all day event: yes.
 - Select 10/18/2023 event - Edit as this occurrence and modify start date as 10/18/2023 to 10/17/2023 - Then the event will be created for 10/17/2023.
 - Now select the event of 10/17/2023 and click on Add to Outlook – select Entire Series.

- It will show to event recurrence – occurs every day effective 10/18/2023 until 10/19/2023.
- **Note:** This is a known issue. It is an outlook behavior for handling this type of event modifications.
- **Issue 2:** Whenever a recurring event is created using the end by date option, for different SharePoint site time zone and local machine user time zone, in that case on editing the event, the end by date shows 1 day extra. Although selecting and editing on different dates will create the functionality working fine. But for same time zone this works fine.
 - For a modified recurring event single instance, the Get link option does not work.
